PERSONAL PROJECTS

Blog App (Web) - Python, Django, PostgreSQL, Bootstrap and JavaScript.

August. 2023 – November. 2023

- A simple blog app with publications, comments, likes system and User preference settings (redirection, publications feed sorting, etc).
- Users can do CRUD operations and like or dislike publications as well as editing the publication's showing preferences.

Chat App (Web) - Python, Django, PostgreSQL, Redis, Cloudinary, Bootstrap and JavaScript

January. 2024 – December. 2024

- A real-time chat application that incorporates several features similar to WhatsApp, including statuses, notifications, and contact management.
- The app also supports CRUD (Create, Read, Update, Delete) operations, allowing users to manage their messages and contacts effectively.
